

Get Ready, Engaged & Informed

US EPA Holds Community Information Sessions on Portland Harbor

Portland, Oregon

February 2016

Get Ready: The Lower Willamette River is a valuable natural resource. However, Portland Harbor, a section of the River between the Broadway Bridge and Sauvie Island, has contaminants which are harmful to people, fish and wildlife. EPA is taking action to make it a cleaner, healthier place to live, work and play. A Proposed Plan that will be released this spring will outline EPA's recommended path for achieving those goals!

Get Engaged: It's not yet time for the plan or public comment. But it is time to engage with EPA to learn more, ask questions and hear information about Portland Harbor before the plan is released.

Get Informed: Come to one of the upcoming Community Information sessions offered by EPA. During the community session EPA will:

- Provide background on Portland Harbor
- Discuss why the cleanup matters to you and the community
- Explain why your input is very important and how you can be engaged
